Subsection 141 (8): is intended to prevent aggressive behaviour among horses. This is not typical of the draft horses that are exported to Japan by air as they have a cooler temperament and are compatible. In keeping with the intent of the Regulations, allowing them to travel together helps to minimize the anxiety as they are more at ease in each other's company. As per

No issues with the horses or crates during pre-loading check or at time of loading onto plane. Crates started to be loaded onto plane at 0250h and finished at 0405h. Plane This was observed by Inspector
